KERR, PROFESSOR J. G., F.R.S., F.R.S.E., F.L.S.	TREDGOLD, A. F., M.D., F.R.S.E.

Evolution, Heredity and Variation.

By D. WARD CUTLER, D.Sc., M.A., Chief Protozoologist to the Rothamsted Experimental Station. With a bibliography and many diagrams. (Christophers, London).

Designed primarily for the use of students, this survey of the fundamental facts of Biology will be of considerable interest to a wide general public, since it will serve as an introduction to the subject which underlies the approach to all the problems of Sociological investigation. The book presents without bias and in a clear form the conclusions arrived at by twentieth century science on this subject of universal concern.

4s. 6d. net; a cheaper edition, for use in schools 3s. 6d.
